Immediate Action:

Done	Inspection or Action
☐	Curtain sections are identified and their positions match the current layout drawing.
☐	Flotation rides evenly with adequate visible freeboard for current conditions.
☐	Float pockets and welds have no open cuts, seam failures or severe abrasion.
☐	Skirt fabric has no unaddressed tears, punctures, brittle areas or pulled seams.
☐	Marine growth and trapped debris are not adding significant load.
☐	ASTM universal connectors are aligned, fully engaged and undistorted.
☐	Toggle pins, shackles and locking hardware are present and secured.
☐	Grommet closures are complete and not tearing through the fabric.
☐	Top tension cable and terminations show no broken wires, kinks or slippage.
☐	The ballast chain is continuous, not severely corroded and not snagged or buried.
☐	Anchor bridles and attachment points are not chafed or overloaded.
☐	Anchor lines, leader chain, buoys and marker lights are serviceable.
☐	Shore anchors and attachment soils/structures remain stable.
☐	No visible sediment plume indicates loss of control beyond the barrier.
